Maximizing control across all surfaces, the XE continually monitors and balances the distribution of torque to improve both the grip and steering of the vehicle. Assisting with its stability, the system reduces understeer by applying the brake to the inside wheels, forcing greater torque to outer wheels. The attention to detail throughout the XE interior accentuates its contemporary nature, from the premium materials to its Riva hoop wrap-around fascia and range of interior finishes. The Jaguar XE features an advanced double wishbone front suspension design based on the F TYPE sports car. This helps give the XE a similar level of agility and connected steering feel. At the rear, an integral link rear suspension made from hollow forged aluminum helps provide excellent lateral and longitudinal rigidity, delivering sharp response and handling while retaining the refined and luxurious ride befitting a Jaguar sports sedan.
